

WTF is Riemann Surface?

What's The Function? $f(z) = \log z$

$$f(e^{i\theta}) = \log(e^{i\theta}) = i(\theta + 2k\pi)$$

one input $\mapsto i\theta, i(\theta+2\pi), i(\theta+4\pi), \dots$

symmetry of shuffling sheets.

symmetry of shuffling roots

$$\text{Deck}(RS \rightarrow \mathbb{C}^*) \cong$$

$$\text{Gal}(L/K)$$

Riemann.

Galois.
